GREEN SITE DESIGN

Photo by Berger Engineering

Low impact development, better site design, green infrastructure, green site design—what do these all have in common? Using soils, plants and natural areas to:

- Improve water quality
- Manage stormwater quantity
- Reduce erosion and sediment control costs
- Improve aesthetics of a project
- Reduce urban heat island effect
- Improve quality of the community
- Meet 2010 DEC requirements for runoff reduction using green infrastructure

Berger Engineering and Surveying, PLLC can help you design and permit a project that uses the principles of:

- **Conservation design**
- **Low impact development**
- **Runoff reduction using green infrastructure**

Berger Engineering and Surveying , PLLC
Green Infrastructure * Conservation Design * Low Impact Development
