MUNICIPAL LAND USE AND PLANNING GIS

Take Your County GIS Connection a Step Further by Taking Control of the Available Data for Your

Chances are, your County has been hard at work gathering all available data for you to view on their connections. Just think what you could do if you had the data in house and at your fingertips to perform specific tasks like:

Accurately document catastrophes such as floods, oil spills, tornado damage and fires by linking pictures and spreadsheets to actual GIS maps

GIS gives you the ability to select specific groups of parcels to identify a problem or situation

Select and print routes for Highway Departments to keep in Highway vehicles for road maintenance a snow removal

Maintain a real time snapshot of your community by applying site plans and subdivisions on a master map

Empower your Board Members by giving them access to an up to date "living map" on their own computers making land use decisions easier to comprehend

Generate your own data by documenting culverts and catch basins as required in an MS4 Community

Let Berger Engineering and Surveying , PLLC Help You Map *Your Future*

We Know Planning...
 Our GIS team is made up of not only Engineers who currently represent Municipalities, but actual Planning Board Members with extensive land use training and real-world experience.
